### **DETAILED ACTION**

This communication is responsive to divisional Application filed on 03/15/2004.

Claims 1-16, 28-33 are pending.

Claims 17-27 are cancelled by the preliminary remarks provided along the filing of the divisional Application.

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, drawn to the insertion or substitution of a program or message (i.e.: emergency warning based on geographic area), classified in class 725, subclass 32.
- II. Claims 28-33, drawn to a business method, classified in class 705, subclass 35.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in

Art Unit: 2662

other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because invention I can be used for emergency messaging in a broadcast system. The subcombination has separate utility such as sharing of revenues between primary and local broadcasting stations.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### ***Conclusion***

5. In the transmittal letter filed on 3/15/2004, Applicants indicated that the anticipated classification of the divisional Application being class 370 and subclass 477. Examiner respectfully disagrees, because as indicated in the restriction of the parent case 10/145,963, Examiner clearly indicated that claims

1-16 and 28-33 were respectively classified in classes 725, subclass 32 and class 705, subclass 35.
